(54) Title: DEVICE AND METHOD FOR DRIVING ANIMALS IN AN OBLONG CORRIDOR SECTION

WO 03/079770 A1

(57) **Abstract:** Device for driving animals in an oblong corridor section (21) by means of a driving gate (2), which can be moved from one end to the other of the corridor section comprises a first transport arrangement (3, 5, 10, 12) to move the driving gate (2) in the corridor section in the longitudinal direction of the section, from a first position (2b) at one end of the section to a second position (2c) at the other end, and to move the gate (2) in the opposite direction, after it has been brought outside the corridor section, from a position (2d), which is opposite the second position (2c) in the corridor section to a position (2a), which is opposite the first position (2b) in the corridor section. The first arrangement comprises a displaceable mountable part (6), which can be moved in the longitudinal direction of the section over a distance corresponding to the distance between the first position (2b) and the second position (2c) of the gate. The device also comprises a second transport arrangement (13, 14, 18, 19) to pull the gate sideways out from the corridor section in the plane of the gate through a gap (26) in one side wall (22) of the corridor section from the second position (2c) in the corridor section and to push the gate sideways into the corridor section in the plane of the gate through a second gap (25) in the side wall (22) from the position (2a), which is opposite the first position (2b) in the corridor section. The second arrangement comprises a second displaceable mounting part (16), to which the gate (2) is fastened. This mounting part can be moved transversely to the longitudinal direction of the section over a distance corresponding to the total width of the driving gate (2) and the side wall (22) provided with gaps.

European patent (AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PT, RO, SE, SI, SK, TR), OAPI patent (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG)

A. CLASSIFICATION OF SUBJECT MATTER

IPC7: A01K 1/00, A22B 1/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7: A01K, A22B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"S" document member of the same patent family
